# INDEX TO AUTHORS

*Brackets indicate senior author's professional history*

A

ACKERMAN, G. ADOLPH. See GRASSO, SWIFT, and ACKERMAN, 235

AFZELIUS, B. A. See BAXANDALL, PERLMANN, and AFZELIUS, 144

AUB, J. C. See RYSER, CAULFIELD, and AUB, 255

B

BARLAND, PETER, NOVIKOFF, ALEX B., and HAMERMAN, DAVID. Electron microscopy of the human synovial membrane, [353] 207

BAXANDALL, JANE, PERLMANN, P., and AFZELIUS, B. A. A two-layer technique for detecting surface antigens in the sea urchin egg with ferritin-conjugated antibody, [157] 144

BEER, MICHAEL, and HIGHTON, PETER J. A simple preparation of graphite-coated grids for high resolution electron microscopy, [501] 499

BEERMANN, WOLFGANG. See EDSTRÖM and BEERMANN, 371

BORNSTEIN, MURRAY B. See ROSS, BORNSTEIN, and LEHRER, 19

BORUM, KIRSTINE. See LIMA-DE-FARIA and BORUM, 381

BOURNE, G. H. See SHANTHAVEERAPPA and BOURNE, 343

BUCKLEY, I. K. Cellular injury *in vitro*: Phase contrast studies on injured cytoplasm, [501] 401

BUTTROSE, M. S. The influence of environment on the shell structure of starch granules, [353] 159

C

CAULFIELD, J. B. See RYSER, CAULFIELD, and AUB, 255

CHIPCHASE, MARGARET I. See RHO AND CHIPCHASE, 183

D

DALES, SAMUEL, and FRANKLIN, RICHARD M. A comparison of the changes in fine structure of L cells during single cycles of viral multiplication, following their infection with the viruses of Mengo and encephalomyocarditis, 281

DAVIES, HOWARD G., and SPENCER, MICHAEL. The variation in the structure of erythrocyte nuclei with fixation, [501] 445

DOWLING, JOHN E., and GIBBONS, I. R. The fine structure of the pigment epithelium in the albino rat, [157] 459

— and SIDMAN, RICHARD L. Inherited retinal dystrophy in the rat, 73

E

EBASHI, SETSURO, and LIPMANN, FRITZ. Adenosine triphosphate-linked concentration of calcium ions in a particulate fraction of rabbit muscle, [502] 389

EDSTRÖM, JAN-ERIK, and BEERMANN, WOLFGANG. The base composition of nucleic acids in chromosomes, puffs, nucleoli and cytoplasm of *Chironomus* salivary gland cells, 371

EILAM, YAEL, and KLEIN, S. The effect of light intensity and sucrose feeding on the fine structure in chloroplasts and on the chlorophyll content of etiolated leaves, 169

F

FELDHERR, CARL M. The nuclear annuli as pathways for nucleocytoplasmic exchanges, 65

FINEAN, J. B. See MILLINGTON and FINEAN, 125

FRANKLIN, RICHARD M. See DALES and FRANKLIN, 281

G

GIBBONS, I. R. See DOWLING and GIBBONS, 459

GIBBS, SARAH P. Nuclear envelope-chloroplast relationships in algae, 433

GOLDSMITH, TIMOTHY H. Fine structure of the retinulae in the compound eye of the honey-bee, [502] 489

GRASSO, JOSEPH A., SWIFT, HEWSON, and ACKERMAN, G. ADOLPH. Observations on the development of erythrocytes in mammalian fetal liver, [353] 235

H

HAMERMAN, DAVID. See BARLAND, NOVIKOFF, and HAMERMAN, 207

HARRIS, PATRICIA. Some structural and functional aspects of the mitotic apparatus in sea urchin embryos, 475

HIGHTON, PETER J. See BEER and HIGHTON, 499

K

KLEIN, S. See EILAM and KLEIN, 169

KOJIMA, KIYOHIDE, and KOZUKA, SADAO. Structural changes in HeLa cells cultivated in serum-free medium, [157] 141

KOZUKA, SADAO. See KOJIMA and KOZUKA, 141

L

LARSEN, JØRGEN FALCK. Electron microscopy of the uterine epithelium in the rabbit, 49

LEHRER, GERARD M. See ROSS, BORNSTEIN, and LEHRER, 19

LIMA-DE-FARIA, A., and BORUM, KIRSTINE. The period of DNA synthesis prior to meiosis in the mouse, 381
LIPMANN, FRITZ. See EBASHI and LIPMANN, 389

M

MACKENZIE, COSMO G., MACKENZIE, JULIA B., and REISS, OSCAR K. Isolation and properties of a cell from liver characterized by lipid-rich particles, 269
MACKENZIE, JULIA B. See MACKENZIE, MACKENZIE, and REISS, 269
MILLINGTON, P. F., and FINEAN, J. B. Electron microscope studies of the structure of the microvilli on principal epithelial cells of rat jejunum after treatment in hypo- and hypertonic saline, [157] 125
MONESI, VALERIO. Autoradiographic study of DNA synthesis and the cell cycle in spermatogonia and spermatocytes of mouse testis using tritiated thymidine, [157] 1
MURRELL, W. G. See OHYE and MURRELL, 111

N

NAGANO, TOSHIO. Observations on the fine structure of the developing spermatid in the domestic chicken, [353] 193
NOVIKOFF, ALEX B. See BARLAND, NOVIKOFF, and HAMERMAN, 207

O

OHYE, D. F., and MURRELL, W. G. Formation and structure of the spore of *Bacillus coagulans*, 111

P

PARKS, HAROLD F. Unusual formations of ergastoplasm in parotid acinous cells of mice, [354] 221
PARSONS, DONALD F. An electron microscope study of radiation damage in the mouse oocyte, 31
PERLMANN, P. See BAXANDALL, PERLMANN, and AFZELIUS, 144

R

REISS, OSCAR K. See MACKENZIE, MACKENZIE, and REISS, 269
RHO, JOON H., and CHIPCHASE, MARGARET I. Incorporation of tritiated cytidine into ribonucleic acid by isolated pea nuclei, [354] 183
ROSS, LEONARD L., BORNSTEIN, MURRAY B., and LEHRER, GERARD M. Electron microscopic observations of rat and mouse cerebellum in tissue culture, 19
RYSER, H., CAULFIELD, J. B., and AUB, J. C. Studies on protein uptake by isolated tumor cells. I. Electron microscopic evidence of ferritin uptake by Ehrlich ascites tumor cells, [354] 255

S

SANDERS, P. C. See SHEPHERD and SANDERS, 346
SEDAR, ALBERT W. Electron microscopy of the oxyntic cell in the gastric glands of the bullfrog, *Rana catesbiana*. III. Permanganate fixation of the endoplasmic reticulum, 152
SHANTHAVEERAPPA, T. R., and BOURNE, G. H. A perineural epithelium, [354] 343
SHEPHERD, G. R., and SANDERS, P. C. The complementary effects of 2-mercaptoethanol and trypsin in the lysis of HeLa cells, [355] 346
SIDMAN, RICHARD L. See DOWLING and SIDMAN, 73
SPENCER, MICHAEL. See DAVIES and SPENCER, 445
SWIFT, HEWSON. See GRASSO, SWIFT, and ACKERMAN, 235

W

WARD, ROBERT T. The origin of protein and fatty yolk in *Rana pipiens*. I. Phase microscopy, [355] 303
—. —. II. Electron microscopical and cytochemical observations of young and mature oocytes, 309

Y

YASUZUMI, G. Electron microscopy and x-ray scanning microanalysis of needle biopsy material from human liver, 421
—. X-ray scanning microanalysis of elemental iron localized in testicular nutritive cells of *Cipangopaludina malleata* Reeve, 495
YOUNG, RICHARD W. Cell proliferation and specialization during endochondral osteogenesis in young rats, [502] 357

# INDEX TO SUBJECTS

A

Adenosine triphosphate-linked concentration of calcium ions in a particulate fraction of rabbit muscle, 389
Algae, nuclear envelope–chloroplast relationships in, EM study, 433
Ameba, *Chaos chaos*, nuclear annuli as pathways for nucleocytoplasmic exchanges, EM study, 65
Annuli, nuclear, as pathways for nucleocytoplasmic exchanges in ameba *Chaos chaos*, EM study, 65
Antibody, ferritin-conjugated, two-layered technique for detecting surface antigens with, in sea urchin eggs, 144
Antigens, surface, of sea urchin eggs, two-layered technique for detection of with ferritin-conjugated antibody, 144

B

Bacterium, *Bacillus coagulans*, formation and structure of spore of, EM study, 111
Bean leaves, etiolated, effect of light intensity on fine structure in chloroplasts and on chlorophyll content of, EM study, 169

C

Cell, characterized by lipid-rich particles, of rabbit liver, isolation and properties of, 269
—, oxyntic, in gastric glands, of *Rana catesbiana*, permanganate fixation of endoplasmic reticulum, 152
— proliferation and specialization during endochondral osteogenesis, in young rats, 357
Cells, Ehrlich ascites tumor, isolated, evidence of ferritin uptake by, EM study, 255
—, epithelial, of rat jejunum, structure of microvillus of after treatment in hypotonic and hypertonic saline, EM study, 125
—, HeLa, complementary effects of 2-mercaptoethanol and trypsin in lysis of, 346
—, HeLa, cultivated in serum-free media, structural changes in, EM study, 141
—, L, changes in fine structure of during single cycles of viral multiplication following infection with viruses of Mengo and encephalomyocarditis, 281
—, parotid acinous, of mouse, unusual formations of ergastoplasm in, EM study, 221
—, salivary gland, of *Chironomus*, base composition of nucleic acids in chromosomes, puffs, nucleoli and cytoplasm of, 371
—, testicular nutritive, of snail *Cipangopaludina malleata* Reeve, localization of iron in, by x-ray scanning microanalysis, 495
Cellular injury *in vitro*, rat pancreas, phase contrast studies on injured cytoplasm, 401
Cerebellum, of rat and mouse, in tissue culture, EM study, 19
Chicken, developing spermatid of, observations of fine structure, 193
Chloroplast–nuclear envelope relationships in algae, EM study, 433
— structure, and chlorophyll content, of etiolated bean leaves, effect of light intensity on, EM study, 169

D

DNA synthesis, prior to meiosis, in mouse oocyte, autoradiographic study, 381

E

Embryos, of sea urchin, structural and functional aspects of mitotic apparatus in, EM study, 475
Endoplasmic reticulum, permanganate fixation of, in oxyntic cell in gastric glands of *Rana catesbiana*, 152
Epithelial cells, of rat jejunum, structure of microvillus of after treatment in hypotonic and hypertonic saline, EM study, 125
Epithelium, perineural, study of, 343
—, pigmented, of rat retina, fine structure of, 459
—, uterine, of rabbit, EM study, 49
Ergastoplasm, in parotid acinous cells, of mouse, unusual formations of, EM study, 221
Erythrocyte, nuclei, of frog, variation in structure of with fixation, EM and phase contrast study, 445
Erythrocytes, in fetal liver, of rabbit and human, development of, EM study, 235
Eye, compound, of honey-bee, fine structure of retinulae of, 489

F

Ferritin uptake, evidence of in Ehrlich ascites tumor cells, EM study, 255
Fixation, permanganate, of endoplasmic reticulum in oxyntic cell in gastric glands of *Rana catesbiana*, 152
Frog, erythrocyte nuclei, variation in structure of with fixation, EM and phase contrast study, 445
—, *Rana catesbiana*, oxyntic cell in gastric glands of, permanganate fixation of endoplasmic reticulum, 152
—, *Rana pipiens*, origin of protein and fatty yolk in oocytes, EM and cytochemical observations, 309
, *Rana pipiens*, origin of protein and fatty yolk in
—, oocytes studied by phase microscopy, 303

G

Grids, graphite-coated, simple preparation of for high resolution microscopy, 499

H

HeLa cells, complementary effects of 2-mercaptoethanol and trypsin in lysis of, 346
— cells, cultivated in serum-free media, structural changes in, EM study, 141
Honey-bee, compound eye, fine structure of retinulae of, 489
Human, liver, needle biopsy material, electron microscopy and x-ray scanning microanalysis of, 421
— and rabbit, erythrocytes, development of in fetal liver, EM study, 235
—, synovial membrane, EM study, 207

I

Insect, *Chironomus*, salivary gland cells, base composition of nucleic acids in chromosomes, puffs, nucleoli and cytoplasm, 371
Iron, elemental, localization of in testicular nutritive cells of snail *Cipangopaludina malleata* Reeve, by x-ray scanning microanalysis, 495

J

Jejunum, of rat, structure of microvillus on epithelial cells after treatment in hypotonic and hypertonic saline, EM study, 125

L

Leaves, etiolated, of beans, effect of light intensity on fine structure in chloroplasts and on chlorophyll content of, EM study, 169
Lipid-rich particles, isolation and properties of a cell containing, in rabbit liver, 269
Liver, fetal, of rabbit and human, development of erythrocytes in, EM study, 235
—, of human, needle biopsy material, electron microscopy and x-ray scanning microanalysis of, 421
—, of rabbit, isolation and properties of a cell characterized by lipid-rich particles, 269

M

Membrane, synovial, of human, EM study, 207
Microscopy, high resolution, simple preparation of graphite-coated grids for, 499
Microvillus, on epithelial cells of rat jejunum, structure of after treatment in hypotonic and hypertonic saline, EM study, 125
Mitotic apparatus, of sea urchin embryos, structural and functional aspects of, EM study, 475
Mouse, L cells, changes in fine structure of during single cycles of viral multiplication following infection with viruses of Mengo and encephalomyocarditis, 281
—, oocyte, period of DNA synthesis prior to meiosis, autoradiographic study, 381
—, oocyte, radiation damage in, EM study, 31
—, parotid acinous cells, unusual formations of ergastoplasm in, EM study, 221
— and rat, cerebellum, in tissue culture, EM study, 19
Muscle, rabbit, adenosine triphosphate-linked concentration of calcium ions in a particulate fraction of, 389

N

Nerve, study of perineural epithelium, 343
Nuclear envelope–chloroplast relationships in algae, EM study, 433
Nuclei, isolated, of pea seedlings, incorporation of tritiated cytidine into RNA of, 183
—, of erythrocyte, in frog, variation in structure of with fixation, EM and phase contrast study, 445
Nucleic acids, base composition of in chromosomes, puffs, nucleoli and cytoplasm of salivary gland cells of *Chironomus*, 371
Nucleocytoplasmic exchanges, nuclear annuli as pathways for, in ameba *Chaos chaos*, EM study, 65

O

Oocyte, of mouse, period of DNA synthesis prior to meiosis, autoradiographic study, 381
—, of mouse, radiation damage in, EM study, 31
Oocytes, of *Rana pipiens*, origin of protein and fatty yolk, EM and cytochemical observations, 309
—, of *Rana pipiens*, origin of protein and fatty yolk, studied by phase microscopy, 303
—, of sea urchin, two-layer technique for detecting surface antigens with ferritin-conjugated antibody, 144
Osteogenesis, endochondral, in young rats, cell proliferation and specialization during, 357
Oxyntic cell, in gastric glands, of *Rana catesbiana*, permanganate fixation of endoplasmic reticulum, 152

P

Pancreas, rat, cellular injury *in vitro*, phase contrast studies on injured cytoplasm, 401
Parotid acinous cells, of mouse, unusual formations of ergastoplasm in, EM study, 221
Pea seedlings, incorporation of tritiated cytidine into RNA of isolated nuclei of, 183
Perineural epithelium, study of, 343
Potato and wheat plants, influence of environment on shell structure of starch granules, EM study, 159

R

Rabbit and human, erythrocytes, development of in fetal liver, EM study, 235
—, liver, isolation and properties of a cell characterized by lipid-rich particles, 269
—, muscle, adenosine triphosphate-linked concentration of calcium ions in a particulate fraction of, 389
—, uterine epithelium, EM study, 49
Radiation damage, in mouse oocyte, EM study, 31
Radioactive label, cytidine-$H^3$, incorporation of into RNA of isolated pea nuclei, 183
— label, thymidine-$H^3$, incorporation in DNA synthesis prior to meiosis, in mouse oocyte, 381
—label, thymidine-$H^3$, incorporation into DNA in

nuclei of bone cells, cell proliferation and specialization during endochondral osteogenesis in young rats, 357
— labels, ADP-$C^{14}$ and ATP-$C^{14}$, in study of adenosine triphosphate-linked concentration of calcium ions in a particulate fraction of rabbit muscle, 389
Rat, inherited retinal dystrophy in, EM study, 73
—, jejunum, structure of microvillus on epithelial cells after treatment in hypotonic and hypertonic saline, EM study, 125
— and mouse, cerebellum, in tissue culture, EM study, 19
—, pancreas, cellular injury *in vitro*, phase contrast studies on injured cytoplasm, 401
—, retina, fine structure of pigment epithelium in, 459
—, young, cell proliferation and specialization during endochondral osteogenesis in, 357
Retina, of rat, fine structure of pigment epithelium in, 459
Retinal dystrophy, inherited, in rat, EM study, 73
Retinulae, in compound eye, of honey-bee, fine structure of, 489
RNA, of isolated nuclei of pea seedlings, incorporation of tritiated cytidine into, 183

S

Salivary gland cells, of *Chironomus*, base composition of nucleic acids in chromosomes, puffs, nucleoli, and cytoplasm of, 371
Sea urchin eggs, two-layer technique for detecting surface antigens with ferritin-conjugated antibody, 144
— urchin, embryos, structural and functional aspects of mitotic apparatus in, EM study, 475
Snail, *Cipangopaludina malleata* Reeve, x-ray scanning microanalysis of elemental iron localized in testicular nutritive cells of, 495
Spermatid, developing, of chicken, observations of fine structure of, 193
Spore, of *Bacillus coagulans*, formation and structure of, EM study, 111
Starch granules, shell structure of, in potato and wheat plants, influence of environment on, EM study, 159
Synovial membrane, of human, EM study, 207

T

Testicular nutritive cells, of snail *Cipangopaludina malleata* Reeve, x-ray scanning microanalysis of elemental iron localized in, 495
Trypsin and 2-mercaptoethanol, complementary effects of in lysis of HeLa cells, 346
Tumor cells, Ehrlich ascites, isolated, evidence of ferritin uptake by, EM study, 255

U

Uterine epithelium, of rabbit, EM study, 49

V

Viruses, of Mengo and encephalomyocarditis, changes in fine structure of L cells during single cycles of viral multiplication following infection with, 281

W

Wheat and potato plants, influence of environment on shell structure of starch granules, EM study, 159

X

X-ray scanning microanalysis, and electron microscopy, of needle biopsy material from human liver, 421
— scanning microanalysis, of elemental iron localized in testicular nutritive cells of snail *Cipangopaludina malleata* Reeve, 495

Y

Yolk, protein and fatty, origin of in oocytes of *Rana pipiens*, EM and cytochemical observations, 309
—, protein and fatty, origin of in oocytes of *Rana pipiens*, studied by phase microscopy, 303

# CONTENTS

## NUMBER 1, JULY, 1962

1 Monesi, Valerio. Autoradiographic study of DNA synthesis and the cell cycle in spermatogonia and spermatocytes of mouse testis using tritiated thymidine
